Guidance Notes

1. If you propose to replace an existing window/door/rooflight the following information is required with this notice:
 - A drawing or written statement indicating/confirming the existing and proposed unobstructed openable sizes (height & width) of all windows to habitable rooms.
 - Details of safety glass in critical locations.
2. If the work involves any structural alterations (e.g. widening of openings) you should submit structural details and calculations to support your proposals in addition to the above requirements.
3. Where replacement windows are to be installed they should not adversely affect the dwelling
 - Fire safety – Windows to habitable rooms should be sized to allow safe escape i.e. have a minimum clear opening of at least 450mm x 750mm.
 - Adequate ventilation openings must be provided.
 - Consideration must be given to the air supply requirements of heating appliances.
 - Units should be draught proofed.
4. Notification of completion of the work must be given to the local authority to allow for inspection. A completion certificate can only be issued if the works comply with the Building Regulations. You are advised to contact us on commencement if you have any enquiries about compliance.
5. This Building Notice ceases to have effect from 3 years after it is given to the local authority unless work has begun before the end of that period.
